

## **St. Xavier's Institute of Education**

### **Report**

**2017-2018**

As an initiative of the Economics Club, the Economics club for the year 2017-2018 conducted two activities.

A GST assembly was conducted by the Economic Pedagogy students of the second year. The assembly was conducted on 9.10.2017. The GST assembly was conducted with an objective to orient the whole class on the benefits and implications of GST. Reflecting on the Institutional theme of Harmony, the students have attempted to understand and propose whether Good and Service Tax would help the citizens of the nation to be in more harmony with each other. The students highlighted the role of the Government in trying to reduce corruption and have more transparency in the system which would ensure harmony to a certain extent in the society.

The first year students of Economics Pedagogy visited the RBI Monetary Museum on 18<sup>th</sup> April, 2018 to understand the role played by RBI in the Indian currency system. The visit to the museum indeed helped students to know the history and evolution of the Indian Currency system. As future teachers of Economics the economics students would use the knowledge gained in the RBI museum in the teaching of Economics and would arrange similar visits for their students.

The students also understood how in the olden times harmony was maintained through the barter system and how conversion to currency system helped to gain more harmony in the trade and business transactions.
