

# Demonstration Lessons on **THEME-BASED LESSON** **EXPERIENTIAL LEARNING STRATEGY BASED ON NAI TALIM**

An experience is a hands-on "feeling and doing" interaction

## What are they?

Nai Talim is a principle promoted by Mahatma Gandhi which states that knowledge and work are not separate. Rather experiential learning or learning by doing is one the most effective methods.

In Theme-based many different activities are linked together by the content; the theme or topic runs through everything that happens in the classroom and acts as a connecting thread for pupils and teacher.
