IQAC Best Practice- Waste Management

New Initiative 2020-2021

“There are few things certain in life – one is death, second is change and the third is waste”.

Generation of waste is inevitable in every era in other words waste generation is a continuous process and we cannot really stop it completely. At the same time we can initiate certain individual habits and activities which will help in creating a culture of minimizing waste at our homes and may be in our surroundings. As we are aware waste management is one of the core aspects of sustainable development goals of UN and our individual initiatives can surely be a meaningful contribution in reducing waste.

For the academic year 2020-2021 SXIE's new initiative under Best Practice – Waste Management is creating a culture of reducing and recycling waste at individual level. The outcomes for the new initiatives are:

- To promote waste reduction activities among the student teachers for the eco-friendly habits
- To encourage waste prevention at individual level
- To foster e-waste recycling among the future teachers
- To help student teachers alter individual habits for the greener tomorrow
- To inculcate the habit of reuse and recycle

Listed below are some of the waste management activities which student teachers can practice at home and if wish can also do their bit in their locality or surrounding keeping in mind all the rules and regulations of new normal and social distancing. These are just few activities individually you can think of few more. Waste management includes all the activities and actions required to manage waste.

Each student of FY B. Ed is expected to choose any two activities of waste management at individual level.

- Segregate recyclable and non-recyclable waste and dispose it in responsibly
- Avoid use of plastics in any form
- Buy food that has minimal packaging
- Use carry bags preferably reusable cloth bags and do not accept any other bags while buying things
- Compost your kitchen waste using proper method of composting
- Perform transactions electronically so that you can minimise use of paper
- Repurpose sturdy containers and recycle other materials
- Donate items whenever possible
- Dispose of hazardous waste in a responsible manner
- To learn the proper way of e-waste disposal

Format of the Individual Report
