

## WHEN ON THE ROAD.....BE SAFE

As future teachers we need to know ways in which we can keep our students informed about the dangers on the road and ways to be safe and protected from such dangers. Therefore on the 6<sup>th</sup> of August 2016 a workshop on road safety was conducted by the Safe Kids Foundation at St. Xavier's Institute of Education.

The session was interactive and lively workshop and the instructors, Ms. Jasmine Vadiya and Dr. Abhirao used a number of teaching-aids to enhance it. They demonstrated how safe-walking, safe-crossing and safe-traveling can be easily implemented by children when traveling. They explained the technical meanings of terms like road, foot path, kerb, pedestrians, and passengers and so on; and oriented us about how their meaning and importance can also be explained to children.

The session was impactful and Snehal who attended it said, "I became aware the actual meaning and function of the zebra crossing and other signals which I used to normally ignore." The workshop brought awareness about the rules and regulations that exist, and motivated us to consciously decide to follow them.
